STORE WINDOWS ARE DARKENED

First Steps Taken Last Night to Conserve Fuel

COMPLY WITH ORDER

Request From Fuel Administrator to Curtail Lighting Until Crisis in Fuel Situation is Over.

The conservation of fuel was inaugurated in Alexandria last night for the first time since the coal shortage has been prevailing.

This was done by cutting down store lights one half and doing away with window display and outside lights and also all other unnecessary lights. As a result King street, the main business thoroughfare of the city, was practically dark last night for the first time in many years.

Practically all of the merchants complied with the request of the officials of the Alexandria County Lighting Company to curtail their light supply.

The request came through Edgar A. Feldtkeller, general superintendent of the Alexandria County Lighting Company, in order to comply with the Fuel Administrators' orders, his coming through D. E. Spangler, chairman, Pocahontas Regional Coal Committee.

Fuel Administration Issues Conservation Orders

Mr. Feldtkeller today issued the following statement:

"Pursuant with the following orders from the United States Railroad Administration acting under orders from Fuel Administrator, Dr. Harry A. Garfield, we notified as many of our customers as we were able to reach last night, requesting them to comply with the instructions regarding curtailment of light and power during the present coal shortage.

While our coal supply during the past weeks has been very limited, we have been exercising every possible precaution in an effort to reduce our coal consumption to a minimum. Through these efforts on our part we were able to continue to supply our customers, without curtailment, although many other lighting and power companies who were less fortunate, have been forced to partially shut off their supply of electric energy, and in some cases to shut down altogether.

As the demand for coal is greatly in excess of the supply and in spite of the settlement of the strike and the administrations best efforts to increase production it becomes necessary to conserve the coal for essential purposes only. Unless the instructions covering curtailment of use of coal and electric energy generated by coal are promptly complied with, and strictly adhered to further drastic steps will become necessary to prevent a national famine.

We were pleased to note the willingness to comply with these orders shown by all the customers we were able to notify last night, and urge all of our patrons to prompt obedience of these orders so that we will be able to get back to normal conditions as quickly as possible. Notice will appear in this same space of any changes or modifications of the Fuel Administrations orders so that all of our patrons may be promptly informed."

The Fuel Administration order follows:

(1) No ornamental lights, white way or other unnecessary street lights, outline lighting, electric signs, or illuminated bill boards, show windows or show case lights, are to be operated. This does not affect street lighting necessary for the safety of the public.

(2) No cabaret, dance hall, pool hall or bowling alleys shall be permitted to use light, except between 7 p. m., and 11 p. m.

(3) Stores including retail stores but excepting stores selling food and warehouses must not use light (except safety lights), except for six hours per day (business day). Manufacturing plants shall be allowed to use light only during the time prescribed for the use of power

(A) Drug stores and restaurants may remain open according to present schedules, but must reduce lighting one half.

(B) Railroad stations, hotels, hospitals, telephone, telegraph and newspaper offices are not included in so far as necessary lighting is concerned.

(C) General and office lights must be cut off not later than 4 p. m., in office buildings, except necessary Federal, State and Municipal offices, and except where office operation of vital industries is involved.

(D) Dairies, refrigerating plants, bakeries, plants for the manufacture of necessary medical products, water works, sewerage plants, printing plants for the printing of newspapers only, battery charging outfits in connection with plants producing light or power for telephone, telegraph or public utility companies are exempted.

4. Only enough heat may be used in offices, stores, warehouses and manufacturing plants to keep the average temperature at 68 degrees Fahrenheit, and then only during the hours for which light is permitted. During other hours only enough heat is to be used to prevent freezing of water pipes or sprinkler systems.

5. In manufacturing plants or plants coming under power curtailment rules heat (to 68 degrees Fahrenheit) will be allowed only during that time prescribed for use of power.

6. No manufacturing plant or factory shall be furnished bituminous coal or coke, or heat, light or power from bituminous coal or coke furnished by or through the United States Fuel Administration, for operation in excess of three days a week on the basis of present working hours.

7. Dairies, refrigerating plants, bakeries, plants for the manufacture of necessary food products, of necessary medicinal products, water works, sewerage plants, printing plants for the printing of newspapers only, battery charging outfits in connection with plants producing light or power for telephone, telegraph or public utility companies are exempted.

8. Elevator service must be curtailed as much as possible in accordance with above regulations on use of heat, light and power.

9. Electric Railways shall reduce schedules to minimum requirements of service under revised hours of heating, lighting and power as herein provide.

10. No heat shall be provided on electric cars during rush hours and heating during non-rush hours shall be curtailed as much as possible.

11. Electric Railways and manufacturing plants, stores and offices shall co-operate in arranging, within the provisions of this order, schedules, days and hours of work to permit the maximum utilization of transportation equipment.

RED CROSS XMAS SEALS

Reports from the various points established in our community for the sale of the Red Cross Christmas seals, are very gratifying, the demand for the seals being most active.

Every Red Cross stamp purchased mean a contribution to the public health and a help towards the work of education that is saving lives. Virginia loses annually 4,000 lives from tuberculosis; has 40,000 people suffering from the disease; 250,000 slightly infected. So every dollar spent in Red Cross seals in Alexandria will be devoted to the fight against tuberculosis in Virginia.

Let our people then buy Red Cross seals to show that they realize that health is worth fighting for and worth paying for.

REPORT OF WORK OF STATE DRY LAW

Peters Shows Department Has Given $10,000 in Excess of Expenditures

SUGGESTS CHANGES

Prohibition Commissioner Would Use Submarine Chasers to Break up Liquor Traffic.

Richmond, Dec. 12.—Use of a submarine chaser loaned by the United States navy for breaking up illicit traffic in Chesapeake Bay and Hampton Roads, the increase of the distilling of "moonshine" whisky the statement that the State Prohibition Department has turned into the Treasury $10,000 in excess of all the funds, drawn out since the department's establishment, and a request for $125,000 to carry on the work for the next two years—these are significant features of the third annual report of Commissioner of Prohibition J. Sidney Peters, for the year ending October 31. The report was made public yesterday.

As required by Section 32 of the Prohibition law, Commissioner Peters has made recommendation for changes in the law. These recommendations will be presented at the next session of the General Assembly.

They are six in number; (1) making the illegal manufacture and transportation of ardent spirits felonies; (2) making it illegal for physicians to prescribe more than a pint of spirits for any patient within the space of ten days; (3) providing for the confiscation of small steamboats and the creation of a lien against more valuable boats used in liquor traffic; (4) removing the privilege of individuals to store spirits; (5) prohibiting the sale of liquors by drug stores; and (6) providing that clerks of courts send to the Prohibition Commissioner copies of orders of court confiscating vehicles for transportation of liquor.

A sharp rap is taken by Commissioner Peters at those who declare that there is no necessity for the State Prohibition Departent because the Federal government has set up machinery for the enforcement of the war time prohibition act If the Federal authorities enforced the law exclusively every case would be tried in Federal courts and fines and confiscations would be turned into the United States Treasury, he says.

The school fund of the state would then lose more than $150,000 a year, which it is now receiving by reason of the enforcement of the prohibition laws by State authorities.

At the new rate of pay and by intensive work, it was stated that men can make as high as $12 a day

SPRINGMAN CASE BAFFLES POLICE

Missing Man Had $600 in Bank When He Disappeared

WIFE FEARS FOUL PLAY

Has Vision of Three Men Struggling With Her Husband—Believes Body May be Found in Woods.

Mrs. Springman, wife of Kenneth M. F. Springman, whose husband mysteriously disappeared last Monday afternoon stated today that she had heard no further tidings concerning the whereabouts of her husband.

Mrs. Springman says she feels thoroughly convinced that her husband has been the victim of foul play. She says she can constantly see a picture before her eyes of three men with caps drawn over their eyes struggling with her husband. She is of the opinion that these men held him up and after robbing him did away with his body, and she thinks that the body will be found in the woods.

Mrs. Springman further stated that when her husband left he had a bank account of $600 and that the money order for $10 sent him some time ago by his brother she found in the pocket of his trousers worn for dress occasions.

The facts strengthen the belief of Mrs. Springman that her husband has been the victim of foul play.

The police say that they have no further clew to the whereabouts of Springman whose disappearance today is as much a mystery as the day he vanished.

It is stated by some persons that there was no blood about the truck on which Springman was a driver and neither did the ground indicate that there had been a struggle.

However, it is pointed out that even though he were attacked by robbers this would not have necessarily followed as he might have been thrown from the truck at some other point and attacked and the truck brought as far as Four mile run for a blind in order to throw the searchers off the track.

RATE HEARING IS CONCLUDED

Telephone Company Will Submit Other Evidence December 17

AWAIT THE VERDICT

Present Rates to Continue Pending Settlement—Jas. H. Botz, State's Expert Gives Testimony

Richmond, Dec. 12.—Hearing of the application of the Chesapeake and Potomac Telephone Company before the State Corporation Commission for an increase in rental charges in the State was temporarily concluded yesterday. December 17 was set as the date for the next hearing, which will involve the jurisdiction of the commission over cities where rates are set by franchises granted the company.

Another hearing will also be held in January, it was announced. This will probably bring the case to a close, it was indicated yesterday. The decision of the Corporation Commission will probably be handed down in January.

James H. Botz, chief accountant of the commission, again took the stand yesterday morning, when the commission convened. He was cross examined by attorneys for the telephone company on depreciation figures, which he set on the company's property in different sections of the State. His depreciation figures were lower than those of the company's accountant, given on the witness stand when the case was first opened and incorporated in the evidence.

WILL CLOSE FACTORY

The Old Dominion Glass Company, which concern gives employment to 450 men, will close down this afternoon owing to the coal shortage according to a statement made today by George H. Schwarzmann, vice president of that concern.

This company is the first manufacturing institution in the city to close down owing to the coal shortage.

At the city gas works today it was stated that they have a sufficient supply of coal on hand to probably last two weeks.

Additional coal is expected, one car load being received today.

That the gas plant with its present supply will be able to wither through the crisis if its usual supply is received is apparent.

The coal on hand, however, is not in the sheds but a considerable distance away from the plant proper which is the reserve supply.

THE CITIZENS NATIONAL BANK

The annual meeting of the shareholders of this bank will be held at the banking house, January 13th, 1920, between the hours of 12 noon and 1 p. m., for the election of directors for the ensuing year and for the transaction of such other business as may properly be brought before the meeting.

GRAND THEATRE

An unusual treat is in store for the patrons of the Grand Theatre tonight, when perhaps the most talented of our present day English actors will be presented upon the screen in the photoplay production made famous by his illustrious father, the great Sir Henry Irving.

"The Lyons Mail" is founded upon a remarkable trial in which a man of honor and position actually fell a victim to his extraordinary resemblance to an assassin. This great drama gives the star the rare opportunity of playing what is conceded to be the most powerful dual role ever created. Indeed screen enthusiasts are fortunate in the fact that it is the happy opportunity of a man so talented as H. B. Irving to draw upon the screen the celebrated characters made famous by his knighted father. Also Western drama.

SPECIAL NOTICE

THE MISSING MAN

The mysterious disappearance late Monday afternoon of Kenneth W. F. Springman, who was last seen near Four-mile run on the Washington pike, is the principal theme of conversation in Alexandria at present. Many theories have been suggested in explanation, but time only can explain the mystery. Springman is a young man, about 24 years old. He has a wife, who is one of our public school teachers, and an infant child. It is difficult to realize that he keeps his whereabouts unknown to them if he is alive. Yet some prefer to believe that he will yet be heard from and a plausible reason for his sudden disappearance given.

The fact that he had in his possession at least one hundred dollars belonging to the bakery company by which he was employed gives weight to the suggestion that he was murdered, robbed and his body disposed of. If this theory be correct, his body would doubtless have been found either in Four mile run or somewehre nearby. Diligent search, however, has failed to bring it to light.

Some one yesterday endeavored to solve the riddle by suggesting that the body may have been placed in a box car, many of which stand near Four-mile run, and by this time might be far away in some other section of the country. This brought to the birth a rumor today that the remains of the missing man had been found in a car at Philadelphia. This rumor was shown to be groundless.

In the meantime his distressed wife and relatives, the latter being residents of lower Fairfax county, are passing through an awful suspense.
